

Review Feedback — Implementation Report

Symanek Specialized College · ERF 2948, Extension 6, Okahandja, Namibia

Date: 19 July 2026

Summary

All the points raised in your review — both the **Website / Student Portal** notes and the **System Audit — School Admin** notes — have been **implemented and deployed to production**.

Public website: <https://symanek-site.vercel.app>

Management system (Symanek Suite): <https://symanek-suite.vercel.app>

Every item from your feedback is listed below with its status. A short list of items that require a value or content from your side (fees, entry requirements, etc.) appears at the end — these are now **editable directly from the system's admin area**, exactly as requested, so no developer is needed to change them.

Part 1 — Website

Page 1 — Home

#	Your request	Status
1	Add "NQA accredited" and "HPCNA registered"	✓ Done

6	Semester subjects (3 formatives: 2 tests + 1 assignment) and year subjects (5 formatives: 3 tests + 2 assignments)	✓ Done
7	All examinations out of 100 marks, written over 3 hours	✓ Done

Part 3 — System Audit: The School Admin

The School Admin now has full control of every module, as follows:

1. Application Component (student biographical information)

- Admin can **add new students**.
- Each student record has an **Action button**: Show profile, Update profile, Documents, Applications, Reset password, Log in as.

2. Admission

- **Manual Admission** — list of students with application status and an Action button to **process** applications (advance or reject).

3. Registration

- Modules registration · Qualification management · Modules management · **Student Blocks** (place/release holds).

4. Students' Marks

- My Modules (per lecturer).
- **Marks Suppression** by academic year and intake, choosing which marks to suppress (CA / Exam / Final).
- **Module Allocation** — allocating modules to teaching staff.
- **Control access, assign permissions and block staff access** (role permission matrix + activate/deactivate).

5. Documents (previously missing)

- Examination permit · Proof of registration · Academic records · Student letters (admission / rejection) · Statement of results — all generated as official, printable documents on the college letterhead.

6. Settings

- Previously empty — now includes institution profile, academic calendar, module toggles, role permissions, user accounts, and the academic control windows above.

Items awaiting your input (now editable in the admin area)

These items are fully wired into the site and system; they only need the correct values/text from the college, which can now be entered and edited from the admin area — no developer required:

- **Bachelor of OHSE (Honours L8, and L7)** — tuition fees and admission requirements.
- **Certificate in Auxiliary Nursing Science** — tuition fee, exact duration and admission requirements. (*A 12-month duration is shown as a placeholder — please confirm.*)
- **Our Values** — the wording currently on the site is a first draft based on your mission/vision; please confirm or replace with the official values.
- **Gallery** — please send the additional graduation photos (from Jeremia) so we can remove repeats and complete the gallery.

Technical confirmation

- Both applications are **live in production** and verified working.
- The **database is in full conformity** — all schema migrations are applied on the live database with no discrepancies.
- All changes have been committed to the project's source repository.
